

Eye Protection Safety Tip:

Ensure safety glasses or face shields are worn anytime work operations can cause foreign objects getting into the eye such as during welding, cutting, grinding, or nailing.

INDUSTRY EXPERT

CoolGray. Backed By Safety. Backed By Testing.

With safety as our only focus, before introducing the **CoolGray A501701 face mask**, Arbill took its 25 years' experience manufacturing N95's to ensure that its inaugural cloth face mask would meet our discerning criteria and safety expectations. Lacking a U.S. standard, Arbill hired an independent laboratory to test ours for breathability and filtration using the established European Afnor standard. The results are phenomenal.

Knowing how effective the mask you're wearing is just got a whole lot more important particularly as the new US ASTM standard is in the works and set to release in 2021.

The New York Times

"A C.D.C. division is working with an industry standards group to develop filtration standards—and products that meet them will be able to carry labels saying so."

- "How Effective Is the Mask You're Wearing? You May Know Soon" - Dec. 16, 2020

If your workforce is working remotely as a result of COVID-19, your regulatory compliance could be adversely impacted. Arbill's e-learning program can help you create an engaging and effective training program uniquely tailored to your needs. With our preferred e-learning partner SafetySkills, we offer over 600 online awareness level courses that can assure EH&S compliance.

Ask one of our Safety Advisors how you can improve your safety culture, increase employee satisfaction, and enhance your regulatory compliance through online training.

Example of available training packages and courses include:

- Electrical Safety
- Emergency & Workplace Security
- Environmental Awareness
- Equipment & Tool Safety
- Hazardous Chemicals & Substances
- Personal Protective Equipment
- Hearing Protection
- Human Resources / Recordkeeping & Reporting
- Occupational Safety Topics
- Construction Safety
- Laboratory Safety
- DOT & Driver Safety
- OSHA 10 Hour for General Industry & Construction
- 8 Hour HAZWOPER Annual Refresher
- **Plus, many more!**

A LETTER FROM THE CEO

A Year in Reflection.

Happy New Year! Thank you for your continued trust in Arbill. 2020 certainly had a profound impact on all of us and we have much to be thankful for. The Arbill team worked tirelessly to ensure that we could continue to service your needs and are proud to say that we helped clients secure much needed items including Nitrile gloves, N95s, sanitizer, masks... and more masks all while providing all the other key PPE items, so we all could get on with the business of working and living.

2020 was also a pivotal year for us as we took our 25 years of experience manufacturing N95s to make the CoolGray mask—a reusable, tested cloth face covering that could be used to not only protect industry, but everyone. In the seriousness of COVID, we made our mask like we make all our products, it is a PPE item that has standards for protection. We wanted to help and truly protect everyone.

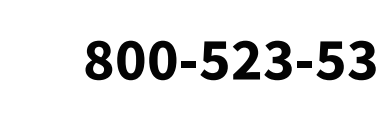

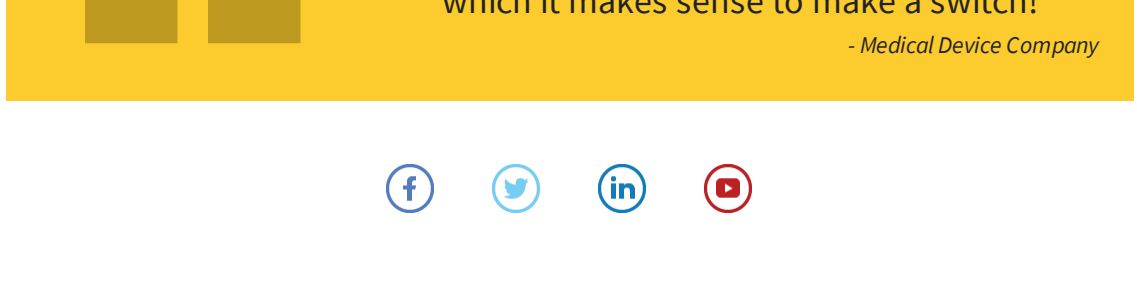

We are also proud to share that Arbill donated nearly 1MM items of PPE to good360.org, where they help ensure the right PPE is delivered to the right people at the right time—throughout all stages of natural disasters. In Arbill as an organization is committed to protect everyone in Arbill as we can. In recognizing our desire to protect, I personally stepped up and accepted the nomination to become a board member of the American Red Cross so that myself, along with Arbill members can support communities in additional and important ways.

We look forward to 2021 and continuing our commitment to make life safer every day, now more than ever.

With gratitude,

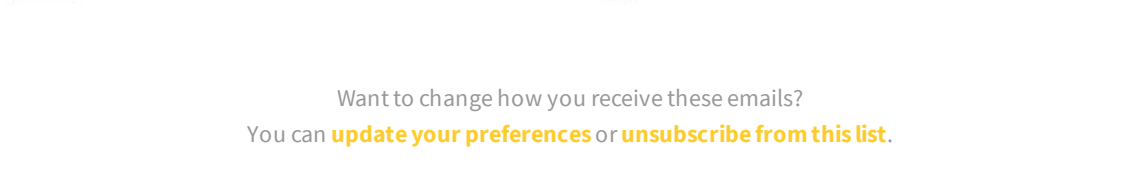

Julie Copeland
Arbill CEO
