INDUSTRY EXPERT

Ergonomics Program—What is it and how can it help my company?

The CDC and NIOSH offer insight and the benefits one can get from engaging in an ergonomics program, where workers can learn how to minimize the physical exertion needed to lift and handle objects.

Ergonomics programs are designed to provide systematic ways to reduce musculoskeletal disorders once risk factors have been identified, analyzed, and controlled. By developing appropriate ergonomic solutions, further losses as a result in a decline in productivity, quality of work, absenteeism, lost time injury and worker's compensation premiums can be mitigated.
