**Choose The Right AED For Your Facility— Every Minute Counts!**

All 50 states have enacted laws and/or regulations requiring AEDs to be available in certain public facilities and locations. States also have passed laws that govern the use, testing, training and maintenance of AEDs that are consistent with the manufacturer's standards.

Not all automatic external defibrillators are the same. With a variety of features, price points and accessories to choose from, Arbill has the expertise you can count on to help you select the right AEDs for your facility.

**LifepakCR2**

- Groundbreaking self-monitoring defibrillator
- General users gain confidence with simple graphics and instructions
- Daily Wi-Fi monitoring with LIFELINKcentral™ AED Alert Program
- Ensures device readiness and effectiveness with alerts
- LIFELINKcentral alerts you if your battery needs charging or your electrodes are expiring
- cprINSIGHT technology provides analysis and detects when a shock is needed, reducing the pause in chest compressions
- The only AED that allows chest compressions during ECG rhythm analysis

**HeartStart Onsite FRx**

- Rugged design and reliability make it easy to set up and use, even in the most demanding environments
- Intuitive display and clear instructions coach the user when treating a person in cardiac arrest
- SMART Pads II can be used for both adults and children and enable the FRx to keep pace with the responders, adjusting to their actions
- Designed to only deliver shock therapy when the rhythm is shockable – even if the Shock button is pressed

**SHOP NOW**

**Zoll AED Plus**

- Fully automatic AED Plus delivers a shock automatically with no rescuer interaction required
- One-piece CPR-D-padz Electrodes simplifies electrode pad placement, falling naturally into the best placement for defibrillation and CPR
- Verbal countdown and audible prompts “DON'T TOUCH PATIENT” if a shock is needed
- Chest CPR varies based on patient's size and build
- Real CPR Help® technology

**CPR, AED, First Aid and Bloodborne Pathogens (BBP) Training Courses**

Arbill offers CPR, AED, First Aid and Bloodborne Pathogens (BBP) training courses in a format to fit your compliance needs, even with COVID restrictions in place, including:

- **On-Site Training:**  
 This 2-6 hour in-person, CPR/AED and First Aid with BBP Affected Worker class will deliver in-person coaching, guidance and skills. Certain restrictions may apply due to COVID-19 and our instructors will follow all recommendations provided by the CDC, state governments and company policies.
- **Remote Skills Verification (RSV) Training:**  
 As result of COVID-19, remote classes offer the ability to train employees with the practical exercise requirements needed, while ensuring they stay safe and healthy.

The fully integrated, remote skills verification system offers a blended training solution that includes: an online cognitive training course, scheduling a skills exam, shipping necessary components to and from the student or training location, peer-to-peer web-based video tool for remote skills assessment by a certified instructor, and issuing a certification all on one platform.

The entire class can be started and completed in the comfort of your own home or office on your time. The certification issued for this course is the same certification you would receive if you chose a traditional or blended class.

**Upcoming Environmental Reporting Deadline**

Since its establishment in late 1970, the Environmental Protection Agency (EPA) has been working to ensure a cleaner and healthier environment, setting standards for enforcing national standards under a variety of laws under consultation with different jurisdictions including state, local and tribal governments.

Do you understand the complexities of environmental reporting and deadlines in your jurisdictions? Have you filed your state's required permits and recordkeeping appropriately? Arbill's EH&S Managed Service Environmental Compliance team can help ensure you meet the first quarter environmental reporting deadlines including:

- Hazardous Waste Generator
- Tier II Reporting
- Air Emissions
- Stormwater Benchmark Reports
- E-Manifest Tracking
- California CERS Reporting
- State Specific Environmental Reporting

**INDUSTRY EXPERT**

**Don't Be Unprepared for Cardiac Emergencies in the Workplace**

Globally, cardiac arrest claims more lives than colorectal cancer, breast cancer, prostate cancer, influenza, pneumonia, auto accidents, HIV, firearms, and house fires combined.

According to the American Heart Association, each year 475,000 Americans can die from cardiac arrest. Cardiac arrest occurs when the heart stops, and CPR pumps the much-needed oxygen-rich blood to the brain, lungs and vital organs.

With more cardiac arrests happening outside of the hospital each year, there are tremendous benefits both inside and outside of the workplace to learning CPR. It's a fact that the faster CPR is administered after a cardiac arrest, a person's chance for survival can significantly increase as much as twice or three times.
