# The Marriage of PPE Partners... "For Better or For Worse?"

by Martin Lill  
**Lakeland**

**CE standards generally treat types of protection as neat, separate issues... protection against chemicals; or protection against heat and flame; or protection against arc flash and so on. This is convenient... but unrealistic.**

Applications often feature more than one hazard; protection might be needed against chemical and heat and arc flash. Most users have to deal not with single but with multiple hazards.

FEATURED PRODUCTS

### LAKELAND PYROLON® CRFR DISPOSABLE COVERALL

Designed to Protect You, and Your Primary FR Garments.

[LEARN MORE HERE](#)

Pyrolon® CRFR fabric is the Chemical Resistant and Flame-Resistant disposable option designed to protect your Primary FR and ARC Rated garments when chemical splash is a concern.

Pyrolon CRFR fabric bars contaminating flammables like paint, oil and grease, hazardous liquids and contaminants, and dry particulates from penetrating to inner Primary Protective Garments, potentially saturating them with flammable substances.

Primary FR Protective Garment

Secondary FR & Chemical Protective Garment

SAFETY TIP:

## SELECT THE PROPER CHEMICAL PROTECTION

Knowing the difference between PERMEATION and PENETRATION is an important distinction when choosing chemical protective equipment.
