

INDUSTRY EXPERT ARTICLE

**Welcome to Safety:
The Importance of
Worker Orientation**

Safety is a priority for many organizations. Those companies that understand the true value of safety have embraced it to protect their workers. They celebrate safety milestones. They reward workers that protect their coworkers by being observant and keeping the workplace safe.

In organizations like these, they are building a Culture of Safety where every employee has a vested interest in being safe. We applaud those companies that have worked safety into their culture.

RADON ACTION MONTH

**TEST YOUR HOME.
PROTECT YOUR HEALTH.**

**Test your home.
Protect your health.**

Radon is an odorless and colorless radioactive gas that occurs naturally. Dangerous levels of radon can build up inside of buildings and exposure to radon is the second leading cause of lung cancer in the US and the first leading cause among non-smokers.

- **Did you know** that the average radon levels in homes is found to be 1.3 pCi/L
- If levels are between 2 pCi/L and 4 pCi/L (picocuries per liter of air), the EPA recommends that you fix your home

ALL THE PRODUCTS TO KEEP YOU SAFE
