A hygienic solution to earplug dispensing.

### Hearing protection has never been easier to access.

Simply place your hand under the automatic dispenser and a pair of earplugs will drop right into your palm. With the TouchFree EcoStation® in your corner, you can eliminate touch points and choose a greener, cleaner workplace for all.

- Built in sensor recognizes when a hand is underneath and dispenses a pair of earplugs
- The most hygienic way to dispense earplugs
- Battery operated - Easy to install with no wiring needed

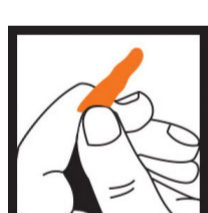

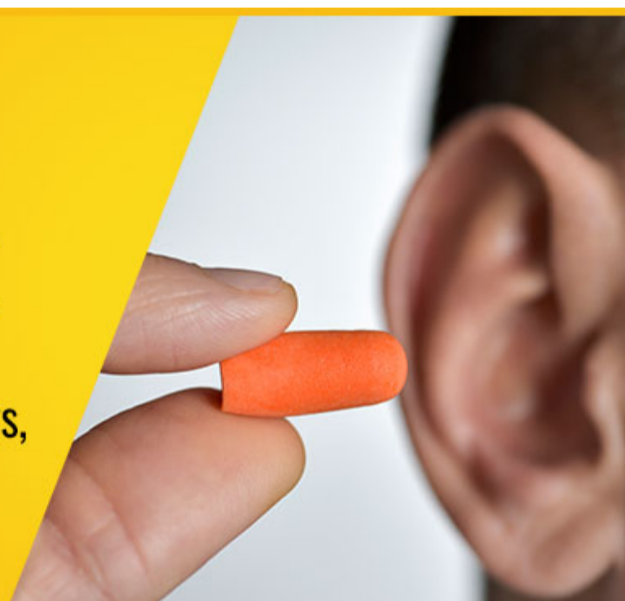

ALL THE PRODUCTS TO KEEP YOU SAFE

#### SAFETY TIP

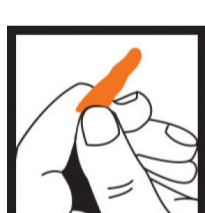

## REDUCE YOUR NOISE EXPOSURE

Always wear hearing protection in noisy areas, and if using foam plugs, insert them correctly into the ear canal.

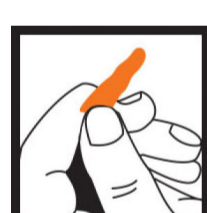

#### 1. ROLL

Create a small, thin snake like shape.

#### 2. PULL

Pull the top of your ear up and back to slide the ear plug in.

#### 3. HOLD

Wait until the ear plug expands to fill your ear canal.

Check that they are fitting properly. When they are properly placed and a seal has been created, your voice will sound muffled.
